GARAGE DOOR HARDWARE

ACOUPLE TUBE COUPLING FOR GARAGE DOORS

Heavy-duty shaft coupling that joins torsion tubes for smooth, reliable garage door operation.

KEY FEATURES / CARACTERÍSTICAS CLAVE

01 Compatible with large-diameter torsion tubes

02 Robust design engineered for sectional garage doors

03 Quick, easy installation in existing door systems

04 Corrosion-resistant finish for harsh environments

05 Durable materials built for extended service life

06 Precision construction for perfect shaft alignment

The ACCESSPRO ACOUPLE is a heavy-duty tube coupling for sectional garage door systems. Mounted on the tubular torsion shaft, it securely joins tube sections to keep springs, cable drums, and shaft perfectly aligned. A robust build, corrosion-resistant finish, and precision fit make it ideal for new installations or retrofits, backed by a 3-year warranty.

TECHNICAL SPECIFICATIONS / ESPECIFICACIONES TÉCNICAS

Model	ACOUPLE
Brand	ACCESSPRO
Product Type	Tube coupling / union for garage doors
Application	Sectional garage door torsion shaft systems
Function	Joins tubular shaft sections of the torsion spring assembly
Compatibility	Large-diameter torsion tubes
Construction	Robust, precision-built for perfect shaft alignment
Finish	Corrosion-resistant
Materials	Durable materials for extended service life
Installation	Mounts on existing garage door systems
System Position	Component No. 11 in door assembly diagram
Works With	Torsion springs, cable drums, tubular shaft, center bracket
Warranty	3 years
SAT Key	30172100

FUNCTIONS / FUNCIONES

01 Couples torsion tube sections into a single shaft

02 Maintains precise alignment of the spring assembly

03 Transfers torsion spring torque across the shaft

04 Supports smooth, balanced door lifting

05 Enables retrofits and repairs of existing systems

06 Resists corrosion for long-term reliability
