VEHICLE DETECTION / ACCESS CONTROL

SYSLM8 MAGNETIC LOOP FOR VEHICLE DETECTION

1.5 x 1.5 m magnetic loop for reliable detection of large vehicles at automated barriers and gates.

KEY FEATURES / CARACTERÍSTICAS CLAVE

01 1.5 x 1.5 m loop sized for large vehicle detection

02 Compatible with 10MATRIXD1224 metal mass loop detector

03 Prevents barrier from closing while a vehicle is present

04 Automatic barrier close activation after vehicle passes

05 Ideal for gates, barriers, and high-traffic access points

06 Easy installation with included video tutorial

07 Backed by a 3-year ACCESSPRO warranty

The ACCESSPRO SYSLM8 magnetic loop delivers reliable vehicle presence detection for automated gates and barriers. Its 1.5 x 1.5 m format is ideal for large vehicles and works with the 10MATRIXD1224 detector to prevent closing while a vehicle is present and trigger automatic closing after it passes. An included video tutorial makes installation fast and simple.

TECHNICAL SPECIFICATIONS / ESPECIFICACIONES TÉCNICAS

Model	SYSLM8
Brand	ACCESSPRO
Product Type	Magnetic vehicle detection loop
Dimensions	1.5 x 1.5 m
Compatible Detector	10MATRIXD1224 metal mass detector
Requires	10MATRIXD1224 detector
Safety Function	Prevents barrier closing with vehicle present
Activation	Automatic barrier close after vehicle passes
Application	Large vehicle detection
Installation	Video tutorial included
Color	Varies by availability
Warranty	3 years
SAT Key	26121600

FUNCTIONS / FUNCIONES

01 Vehicle presence detection in barrier zone

02 Anti-close safety while vehicle is present

03 Automatic barrier closing after vehicle passes

04 Large vehicle detection with 1.5 x 1.5 m loop

05 Works with 10MATRIXD1224 metal mass detector

06 Suitable for gates, barriers, and access lanes
