ACCESS CONTROL / PROTECTIVE HOUSING

JY-004-M UNIVERSAL METAL PROTECTIVE ENCLOSURE

Rugged metal housing that shields access control and facial recognition terminals in extreme environments.

KEY FEATURES / CARACTERÍSTICAS CLAVE

01 Heavy-duty metal housing built for extreme conditions

02 Universal design adapts to multiple access control models

03 Precise 312 × 150 × 129 mm form factor

04 Protects access control and facial recognition equipment

05 Wide operating temperature range: -50°C to 60°C

06 Withstands 5% to 95% relative humidity

The ACCESSPRO JY-004-M is a universal protective metal enclosure engineered to safeguard access control and facial recognition equipment in the harshest conditions. Its heavy-duty metal housing, precise 312 × 150 × 129 mm footprint, and wide -50°C to 60°C operating range with 5%–95% humidity tolerance keep critical security hardware protected and performing.

TECHNICAL SPECIFICATIONS / ESPECIFICACIONES TÉCNICAS

Model	JY-004-M
Brand	ACCESSPRO
Product Type	Universal protective enclosure
Material	Metal
Dimensions	312 × 150 × 129 mm
Operating Temperature	-50°C to 60°C
Operating Humidity	5% to 95%
Compatible Equipment	Access control and facial recognition devices
Fit	Universal, compatible with multiple access control models
Environmental Resistance	Rated for extreme temperature and humidity conditions
Warranty	0 years
SAT Key	46171619

FUNCTIONS / FUNCIONES

01 Physical protection for access control terminals

02 Shields facial recognition devices from harsh conditions

03 Universal fit for multiple device models

04 Maintains performance from -50°C to 60°C

05 Operates in 5% to 95% humidity environments

06 Durable metal barrier for demanding installations
