GATE AUTOMATION / ACCESS CONTROL

PK03-M HIGH-TORQUE SWING GATE MOTOR

24 VDC piston motor for swing gates up to 300 kg per leaf, with quiet operation and remote control included.

KEY FEATURES / CARACTERÍSTICAS CLAVE

01 High-torque 24 VDC motor for fast, reliable gate opening

02 Handles swing gate leaves up to 3 m long and 300 kg

03 Quiet, efficient operation with a 3200 RPM motor

04 Overload and overheat protection for longer service life

05 IP44-rated housing for dependable outdoor performance

06 Manual release for easy operation during power outages

07 Remote control included; works with optional photocells

The ACCESSPRO PK03-M is a high-torque piston motor for swing gate automation, delivering quiet, efficient performance in a compact, easy-to-install design. Its 24 VDC, 40 W motor drives leaves up to 3 m and 300 kg at 1.6 cm/s, while overload and overheat protection, IP44 weather resistance and a manual release mode ensure safe, dependable operation. Remote control included.

TECHNICAL SPECIFICATIONS / ESPECIFICACIONES TÉCNICAS

Model	PK03-M
Brand	ACCESSPRO
Application	Swing gates (up to 3 m x 2 leaves)
Motor Voltage	24 VDC
Motor Power	40 W
Motor Rotation Speed	3200 RPM
Opening Speed	1.6 cm/s
Max Piston Stroke	330 mm (400 mm optional)
Max Gate Length (per leaf)	3 m
Max Gate Weight (per leaf)	300 kg
Operating Temperature	-20 °C to 55 °C
Protection Rating	IP44
Max Continuous Operation	5 min
Warranty	1 year
SAT Key	46171619

FUNCTIONS / FUNCIONES

01 Automates swing gates up to 3 m and 300 kg per leaf

02 Remote control operation included

03 Manual release mode for power outages

04 Supports optional photocells for added safety

05 Compatible with optional warning lamp

06 Adjustable end-of-travel stops for precise travel

07 Integrates with existing security systems

08 Front and rear brackets for flexible installation
